

## Day 02 : Tasks

The following 5 tasks are to be finished before Day 03. Good luck 😊

---

1. (Read) From “প্রথম অংশ - সি++ নিয়ে বকরবকর” the “Structure” part. You may read more if you want - <https://sites.google.com/site/smilitude/cpp>
2. Visualize Linked List operations (Create, Search, Insert, Delete). [Try slowing down the animation with the bottom left slider to get better understanding of what's happening] - <https://visualgo.net/en/list>
3. (Read) Linked List, Huy's Blog- <https://huytd.github.io/posts/algorithms/01-data-structures-linked-list.html>
4. Implement a Linked List which is initially empty, with 2 operations: Insert (append the value at the end of the list), Search (check if a value exists in the list).  
**Hint:** Use methods for every operation.
5. (Read) Stack, Shafaet's Blog - <http://www.shafaetsplanet.com/?p=2342>
